Contents Volume 15 (1987)

Vol. 15, No. 1

Guest Editorial V
Forging die design and flow simulation: their integration in intelligent knowledge-based systems
P. Hartley, C.E.N. Sturgess, T.A. Dean and G.W. Rowe (Birmingham, Great Britain) 1
Modelling the variation of the yield stress within the temperature range typical for cold and warm metal forming
Z. Marciniak and A. Konieczny (Warszawa, Poland) 15
The influence of an ordered flow-pattern on the properties of cold plug-drawn seamless tubing
T.Z. Blazynski (Leeds, Great Britain) and J. Luksza (Cracow, Poland) 39
Ball-drop forming of coated steel sheets
A.G. Mamalis, G.C. Vosniakos and A.J. Zavaliangos (Athens, Greece) 53
A note on the influence of some factors affecting curvature in the flat rolling of strip
J. Pośpiech (Birmingham, Great Britain) 69
Investigation of the strength retention of a warm-rolled austenitic stainless-steel through hot-hardness measurements
S. Venkadesan, G. Venkataraman and V. Seetharaman (Kalpakkam, India) 81
Simulation study of the optimal initial roll profile in strip rolling, using three-dimensional analysis
H.-K. Oh and K.-H. Kim (Soowon, South Korea) 91
Book Reviews 107
Diary of Events 113

Vol. 15, No. 2

A study of the axi-symmetric forward extrusion of porous metal through a square die
H.-K. Oh and J.-W. Phark (Soowon, South Korea) 119
The relationship between the deep-drawability and the *r*-values of sheet metals
K. Suzuki (Tokyo, Japan) 131
A practical stress–strain–strain rate–temperature constitutive relation of the power form
J.R. Klepaczko (Metz, France) 143
The influence of the processing parameters on the performance of the two-roll piercing operation
E. Erman (Bethlehem, PA, U.S.A.) 167
On the strain distribution during the stretch-forming of low- and high-strength sheet steels
E. Schedin and A. Melander (Stockholm, Sweden) 181
Temperature characteristics of the billet and the dies in a small batch forging production
S. Shama Sundar, A.G. Marathe and S.K. Biswas (Bangalore, India) 203
On the possibility of the positron annihilation method to detect vacancy clusters in shock-loaded metals
N.M. Nancheva (Russe, Bulgaria) 215
The effect of a field shaper in electromagnetic tube bulging
H. Suzuki, M. Murata and H. Negishi (Tokyo, Japan) 229
Book Reviews 241

Vol. 15, No. 3

A knowledge-based systems framework for computer-aided technologies in metalforming
M. Karima and J. Richardson (Cambridge, Ontario Canada) 253
Model for the deformation of a round bar in a triangular roll pass
J. Pośpiech (Gliwice, Poland) 275
Linear finite-element analysis of a cylindrical forging-die under load
N.A. Abdul (Lagos, Nigeria) 283
The unity of upper-bound approaches to plane-strain deformation problems
B. Avitzur (Bethlehem, PA, U.S.A.), J.C. Choi (Pusan, S. Korea) and J.M. Kim (Ulsan, S. Korea) 297
Lead as a model material in the investigation of shear-type metal flows
J.H. Mohamed (Baghdad, Iraq) and T.Z. Blazynski (Leeds, England) 309
A damage criterion for ductile fracture and its modification applied to sheet metal forming
B.X. Yang and W.H. Tai (Beijing, P.R. China) 319
Macroscopic and microscopic phenomena of electro-discharge machined steel surfaces: An experimental investigation
A.G. Mamalis, G.C. Vosniakes, N.M. Vaxevanidis (Athens, Greece) and J. Prohászka (Budapest, Hungary) 335
Force and energy during the cold Hooker extrusion of sintered iron preforms
P. Venogupal, S. Venkatraman, R. Vasudevan and K.A. Padmanabhan (Madras, India) 357

Short Communication
Residual stresses caused by the indentation phase of rotary forcing
E. Appleton (Cambridge, England), C.M. Day (Bristol, England), J.M. Notter (Middlesex, England) and J.R. Moon (Nottingham, England) 375

Diary Supplement 385
Acknowledgement of Referees 392
Author Index Volume 15 392
